

DB40-G_Firmware_V1.11 Upgrade Log:

1. Added VOX function, allowing the use of the 'ENR' key on the microphone as a shortcut to toggle the VOX on or off. VOX level settings can be adjusted in the menu accessed by pressing the "*" key.
2. Disabled the previous menu function accessed by pressing the "ENR" key, and now only the "*" key can enter the menu options.
3. Extended the waiting time for editing the radio's channel name from 5 seconds to 10 seconds.
4. Added a keyboard lock feature - press and hold the "#" key to toggle the lock on or off.

DB40-G_CPS_V1 Upgrade Log:

1. Added the ability to edit channel names, allowing for up to 8 characters to be entered.
