

UB15-G Firmware Upgrade Instructions

1. Getting Started

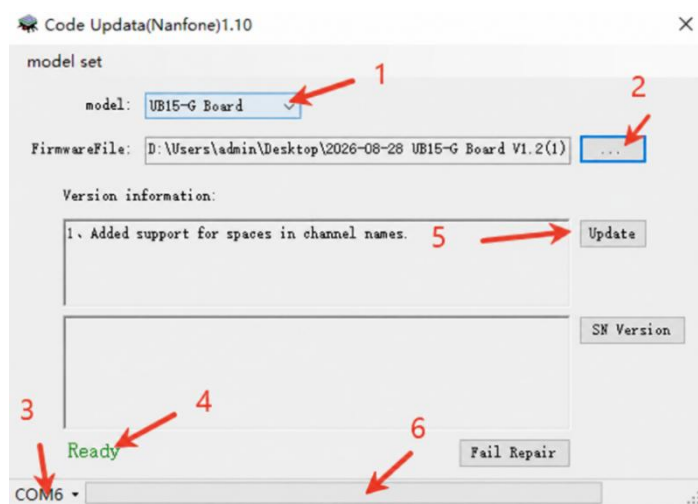

1. Extract the downloaded files. No installation is required.
2. Open CodeUP.exe.

2. Interface Overview

1. Model Selection
2. Firmware Selection Button
3. Serial Port Selection
4. Upgrade Status
5. Firmware Upgrade Button
6. Progress Bar

Hand Mic Upgrade Interface

Main Unit Upgrade Interface

3. Upgrade Procedure

The Hand Mic and Main Unit must be updated separately. You can update the Hand Mic first, then repeat the procedure for the Main Unit.

1. Turn on the device and connect it to the computer using the programming cable.
2. Open **Device Manager** and confirm that the programming cable driver is installed correctly and that a COM port is available.
3. Under **Model**, select "UB15-G Handmic"
4. Click the **Firmware Selection Button** and select the matching Hand Mic firmware file (UB15-G Handmic_V0.0.0.7_20260908.nanfone).
5. Review the version information and confirm that the selected firmware file is correct.
6. Select the programming cable's **COM port** in the lower-left corner of the software.
7. Click **Update** to begin the firmware upgrade.
8. After the Hand Mic upgrade is complete, select "**UB15-G Board**" under Model, choose the matching Main Unit firmware file (UB15-G Board V1.2_2026-09-29 .nanfone), and repeat the upgrade.

When the upgrade is complete:

- "Success" is displayed in green when the upgrade is successful.
- "Timeout" is displayed in red if the upgrade fails.

4. Precautions and Troubleshooting

1. Do not disconnect the device power supply or programming cable while an upgrade is in progress.
2. If the handshake fails after you click Update, check the programming cable connection and confirm that the driver is installed correctly.
3. If the handshake succeeds but a timeout occurs when the progress bar is about halfway complete, check the power supply and programming cable connection. Then use Fail Repair to repair the device.
